

Scope of Work – The Circuit Bowling Association

Project Overview

The project involves developing a complete digital platform for **The Circuit Bowling Association** consisting of:

- Public Website
- User Mobile Application (Bowler/Team Member)
- Team Owner Mobile Application
- Centralized Admin Dashboard

The platform will allow bowlers to register, join teams, view statistics, and stay updated with league information. Team owners will manage their teams, players, schedules, and performance through a dedicated mobile application.

The admin dashboard will provide complete control over users, teams, statistics, content, and association operations.

All platforms will be connected through a shared backend, ensuring real-time synchronization between the website, mobile applications, and admin dashboard.

Objectives

- Develop a modern website and mobile applications for team owners and members.
 - Provide a seamless registration process for members and team owners.
 - Enable users to access team information, statistics, news, and updates.
 - Allow team owners to efficiently manage their teams and players.
 - Centralize platform management through a single admin dashboard.
 - Ensure data is synchronized across the website and mobile applications.
 - Create a scalable platform that supports future growth and enhancements.
-

1. Website Scope

The website will act as the main public platform.

Homepage

Features:

- The Circuit Bowling Association Introduction
- Latest news and announcements
- Upcoming tournaments/events
- Team highlights
- Player highlights
- Ranking preview
- Registration options
- Mobile app download section
- Contact information

User Registration

Visitors can register as individual bowlers/team members.

Registration fields:

- Full name
- Email address
- Contact number
- Password
- USBC Member Number
- Team selection
- Profile picture

After registration, users can access their account on both website and mobile application.

Team Owner Registration

Visitors can register as team owners.

Registration fields:

- Team owner name
- Email address
- Contact number
- Password
- Team name
- Team logo
- Team description
- Team information

Team owner registrations will require admin approval before activation.

Team Directory

Users can view:

- Team profiles
- Team names
- Team logos
- Team members
- Team rankings
- Team performance

Player Statistics

Display:

- Player rankings
- Bowling averages
- Performance statistics
- Season records
- Achievements

News & Updates

Admin-managed content:

- Association news
- League updates
- Tournament announcements
- Important notices

Updates will sync with both mobile apps.

Events & Tournament Section

Features:

- Upcoming events
- Tournament schedules
- Match information
- Results
- Standings

2. User Mobile App (Bowler / Team Member)

The user application will allow bowlers to manage their profiles and stay connected with the association.

Registration & Login

Users can:

- Create account
- Login
- Reset password
- Update profile

Account details:

- Name
- Email
- Contact number
- USBC Member Number
- Team information

User Dashboard

Displays:

- Latest news
- Team updates
- Upcoming events
- Personal statistics
- Rankings

Profile Management

Users can manage:

- Personal information
- Profile photo
- USBC number
- Team association

Team Information

Users can:

- View selected team
- View teammates
- View team statistics
- Receive team announcements

Player Statistics

Users can view:

- Individual scores
- Bowling average
- Match history
- Rankings
- Performance records

Notifications

Users receive:

- News updates
 - Tournament reminders
 - Team announcements
 - Important alerts
-

3. Team Owner Mobile App

The team owner application will allow team owners to manage their teams.

Team Owner Dashboard

Overview:

- Team members
- Team statistics
- Rankings
- Upcoming matches
- Recent activities

Team Creation & Management

Team owners can:

- Create team profile
- Upload logo
- Update team details
- Manage team information

Player Management

Features:

- View roster
- Invite players
- Approve player requests
- Remove players
- View player details

Team Statistics

Display:

- Team performance
- Player performance
- Team ranking
- Match history

Schedule Management

Team owners can:

- View schedules
- Add team events
- Manage match information
- Track results

Team Communication

Team owners can:

- Send announcements
 - Share updates
 - Notify players
-

4. Admin Dashboard

The admin dashboard will provide complete control of the platform.

Dashboard Overview

Admin can view:

- Total members
- Total teams
- Active users
- Registration activity
- Platform statistics

User Management

Admin can:

- View users
- Edit profiles
- Approve accounts
- Manage members
- Verify USBC information

USBC Member Management

Features:

- Store USBC member numbers
- Verify member status manually
- Mark users as verified/unverified
- Display verification status across platforms

Team Management

Admin can:

- Approve team registrations
- Manage team owners
- Edit teams
- View team rosters
- Remove teams

Statistics Management

Admin can manage:

- Player statistics
- Team statistics
- Rankings
- Match results

Content Management

Admin can manage:

- News
- Announcements
- Events
- Tournament information

All updates will sync with website and mobile apps.

Tournament Management

Admin can:

- Create tournaments
- Add schedules
- Update results
- Manage standings

Notification Management

Admin can send:

- Push notifications
 - League announcements
 - Tournament reminders
 - Important updates
-

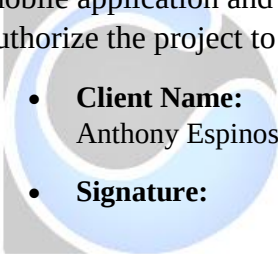

Deliverables

The project includes:

- Responsive website
 - User mobile application (iOS & Android)
 - Team owner mobile application (iOS & Android)
 - Admin dashboard
 - Backend development
 - Database setup
 - Authentication system
 - Push notifications
 - Deployment support
-

Client Approval:

I, the undersigned, hereby confirm that I have reviewed and understood the scope of work for the mobile application and website. I acknowledge and approve the documented requirements and authorize the project to proceed to the next phase of development with Design Centura.

- **Client Name:**
Anthony Espinosa
